Volume B

Foreword to Volume B	653
A Few Words About the Authors!!!	657
Contents of Volume B	663
Contents of Volume A	668
CHAPTER 5. Keys - Locks	673
5.1. General	673
5.1.1. Identification and Examination of Keys and Locks [6]	673
5.1.2. Examination of Keys [6]	674
5.1.3. Types of Locks [7]	678
5.1.4. Defender [7]	679
5.1.5. Master-Key Systems [7]	680
5.1.6. Panic Bars [7]	681
5.1.7. Various Mechanisms [7]	682
5.1.8. Electric Strike [7]	683
5.1.9. Access Control [7]	683
5.1.10. Armored Doors [7]	684
5.1.11. Remote Controls [6]	684
5.1.12. Examination of Locks [6]	685
Case Studies	685
5.2. Immobilizer & Transponder [7]	695
Case Studies	697
5.3. Burglary Tools [6]	699
5.4. Burglary Methods [7]	702
Case Studies	707
5.5. Individual Characteristic Toolmarks in Burglary Identification - BKA [2]	708
Case Studies	717
5.6. Safes [7]	722
Case Studies	724
5.7. Biometric Technology [7]	728
5.8. Association of Keys with Suspects [6]	730
5.9. Statistical Analysis - Repeatability [6]	730
Case Studies	731
5.10. Standards and Tests [6]	735
Chapter Summary	736
Chapter Bibliography - Sources	737
CHAPTER 6. Cartridge Case Ejection	739
6.1. General - Definitions	739
6.2. Ejection Distance	741
6.3. Cartridge Cases from Semi-Automatic Pistols	742
6.4. Cartridge Cases from Semi-Automatic and Automatic Submachine Guns and Rifles	748
6.5. Cartridge Cases from Revolvers	752

6.6. Cartridge Cases from Shotguns	753
6.6.1. Shotguns	753
6.6.1.1. Semi-Automatic Shotguns	753
6.6.1.2. Repeating Shotguns	755
6.6.1.3. Repeating Shotguns and Rifles, With or Without a Bolt Action	757
6.6.2. Double-Barreled Shotguns	759
6.6.3. Single-Barreled Shotguns	759
6.6.4. Flobert	760
6.7. Method of Holding a Firearm	761
6.8. Shooter Position Determination	764
Case Studies	764
Chapter Summary	773
Chapter Bibliography - Sources	774
 CHAPTER 7. Trigger Pull Weight	 777
7.1. General	777
7.2. Trigger Pull	779
7.3. Unintentional Discharges - Trigger Safety Measures	782
7.4. Struggle for Possession of the Firearm	786
Case Studies	786
Chapter Summary	793
Chapter Bibliography - Sources	794
 CHAPTER 8. Gunshot Acoustics	 795
8.1. General Principles of Sound	795
8.2. Room Acoustics and Sound Propagation - Absorption and Reflection	798
8.2.1. Types of Sound [30]	800
8.2.2. Wave Phenomena [30]	800
8.3. Gunshot Acoustics and Gunshot Sound Levels	802
8.4. Reaction Time to an Auditory Stimulus	814
8.4.1. Parameterization	819
8.5. Recognition and Interpretation of Acoustic Variation - Rate of Fire	819
Case Studies	820
8.6. Acoustics of Suppressed Firearms	824
8.7. Linear Compensators	831
Case Studies	833
Chapter Summary	833
Chapter Bibliography - Sources	834
 CHAPTER 9. Cartridge Case and Bullet Alloys - Metals	 837
9.1. Chemical Composition - Alloys	837
Case Studies	839
9.2. Oxidation	853
9.3. Galvanic Corrosion	855
9.3.1. Brasses (Cu-Zn Alloys)	856
9.3.3. Iron	858
Case Studies	860
Chapter Summary	861
Chapter Bibliography - Sources	862
 CHAPTER 10. Serial Number Restoration	 863
10.1. General	863
10.1.1. Terminology	864
10.2. Restoration Methods - Theoretical Basis	864

10.2.1. Heat Treatment	866
10.2.2. Ultrasonic Cavitation	867
10.2.3. Polishing - Grinding	867
10.2.4. Metallographic Method	867
10.2.5. Chemical Etching	868
10.3. Chemical Reagents	869
10.4. Methods and Techniques for Obliteration, Alteration, and Fabrication of False Numbers	871
10.4.1. Obliteration - Abrasion (Removal) of the Original Number, Using: [2,6]	871
10.4.2. Alteration of a Chassis or Engine Number:	871
10.4.3. Fabrication of a False Chassis or Engine Number:	871
10.4.4. Insertion - Embedding of a Chassis Number:	872
10.4.5. Metal Implantation:	872
10.4.6. Vehicle Identification Number (VIN):	873
Case Studies	874
Chapter Summary	879
Chapter Bibliography - Sources	879
CHAPTER 11. The Ricochet Phenomenon	881
11.1. General	881
11.1.2. Definitions	881
11.2. Analysis of the Phenomenon	884
11.3. Material Hardness and Compliance - Deflection and Deviation	889
11.4. Impact Marks on Surfaces	891
11.5. Examination of Ricocheted Bullets	894
11.6. Examination of Surfaces Involved in a Ricochet	897
11.6.1. Rigid Surfaces	898
11.6.2. Yielding Surfaces	898
11.6.3. Ricochet and Surfaces	898
11.7. Directionality and Direction of Ricochet	901
11.7.1. Initial Contact Point (Pinch Point)	902
11.7.2. Bow Effect	903
11.7.3. Chisum Trail	904
11.7.4. Lead-In Mark	904
11.7.5. Bullet Wipe	904
11.7.6. Material Transfer and Embedding	904
11.7.7. Bullet Splash (Lead Splash)	905
11.7.8. Paint Fracture Lines	905
11.7.9. Deepest Point	906
11.7.10. Comprehensive Approach	907
11.7.11. Double Ricochet Mark on Vehicle Sheet Metal	907
11.8. Conclusions	908
Case Studies	908
Chapter Summary	923
Chapter Bibliography - Sources	924
CHAPTER 12. Gunshot Residue - GSR	925
12.1. General - Definitions	925
12.1.1. Propellants:	927
12.1.2. Auxiliary Materials:	929
12.1.3. Explosive Materials:	929
12.1.4. Primers:	930
12.2. Detection of Propellant and Soot Residues	932
12.3. Lead-Residue Detection Test	935
12.4. Copper-Residue Detection Test	938

12.5. Trace-Element Detection Test	938
12.6. Modern Methods for Detecting Primer Gunshot Residue (pGSR)	939
12.7. Where Do Inorganic GSR Particles Originate?	941
12.8. How Are GSR Particles Produced?	942
12.9. Characteristic, Consistent, and Commonly Associated Particles	942
12.10. Residue Deposition	944
12.11. Difference Between Primer Gunshot Residue (pGSR) and Propellant Residue	947
12.12. Differences and Similarities Between GSR and Residues of an Activated Pyrotechnic Composition	948
12.13. Muzzle-to-Target Distance Determination	949
12.14. Evidential Value of Gunshot Residue	953
12.15. Contamination	955
12.16. Results - Conclusions	956
Case Studies	956
Chapter Summary	962
Chapter Bibliography - Sources	963
 CHAPTER 13. Explosive and Flammable Substances	965
13.1. Legal Framework	965
13.2. Historical Development of Explosives	965
13.3. Principles of Combustion	969
13.4. Explosive Substance	970
13.4.1. Types of Explosives	974
13.4.2. Effects of Explosions [12]	985
13.4.3. The Explosion Mechanism	989
13.4.4. Explosive Devices	991
13.4.5. Differences Between Ignition and Explosion	992
Case Studies	993
13.5. Pyrotechnic Composition	997
13.6. Difference Between an Explosive Substance and a Pyrotechnic Composition	997
Case Studies	999
13.7. Flammable Materials	1000
13.7.1. Incendiary Devices	1000
13.7.2. Flash Point of Materials	1001
Case Studies	1004
13.7.3. Difference Between Explosion and Fire - Ignition Mechanism	1004
Case Studies	1006
13.7.4. Conventional Molotov Cocktails	1007
Case Studies	1010
13.8. Investigation of Explosion and Fire Scenes	1012
Case Studies	1013
Chapter Summary	1015
Chapter Bibliography - Sources	1016
 CHAPTER 14. Wound Ballistics	1019
14.1. General	1019
14.2. Zones of Tissue Displacement Relative to Bullet Energy	1023
14.3. Characteristics of a Bullet Entrance Wound	1025
14.4. Hard-Contact Gunshot Wounds	1028
14.5. Contact Gunshot Wounds	1029
14.6. Near-Contact Gunshot Wounds	1033
14.7. Angled Near-Contact Entrance Wounds	1036
14.8. Intermediate-Range Gunshot Wounds	1037

14.9. Distant-Range Gunshot Wounds (Long-Range Shooting)	1039
14.10. Characteristics of a Bullet Exit Wound	1039
14.11. Shotgun Wounds	1041
14.12. Other Findings Indicative of Firing Distance	1048
14.13. Stopping Power	1048
14.14. Capacity for Movement After Sustaining a Fatal Injury	1051
14.15. Wounds Caused by Ricocheted or Deflected Bullets	1053
Case Studies	1054
14.16. Skin Penetration	1059
14.16.1. Minimum Velocity for Skin Perforation (Skin Perforation Velocity Threshold) --	1059
14.17. Penetration and Lethality of Shotgun and Air-Gun Loads	1062
14.17.1. Shot Pattern from Shotguns	1064
Case Studies	1065
14.17.2. Hazards of Air Guns	1078
Case Studies	1079
14.18. Bloodstain Pattern Analysis [31]	1081
14.18.1. General	1081
14.18.2. Bloodstain Pattern Analysis	1082
14.18.3. Mathematics - Physics	1085
14.18.4. Biology and Environmental Conditions	1085
14.18.5. Angle-of-Impact Calculation	1085
14.18.6. Representative Types of Bloodstains	1087
Case Studies	1092
14.19. Tissue Changes and Wound Cavities	1099
14.19.1. General	1099
14.19.2. Theoretical Analysis	1104
14.19.3. Energy Transfer to Tissue from Handguns (Handgun Wound Profiles) ...	1108
Case Studies	1114
14.19.4. Military Rifle Wounds (Rifle Wound Profiles)	1123
Case Studies	1141
14.19.5. Energy Transfer to Tissue from Shotguns (Shotgun Wound Profiles) ...	1144
14.19.6. Energy Transfer to Tissue from Blank-Firing and Gas Weapons (Knall Wound Profiles)	1148
14.19.7. Energy Transfer to Tissue from Air Guns (Air-Gun Wound Profiles) ...	1148
Case Studies	1150
14.20. Ballistic Pathological Anatomy Findings	1152
14.20.1. General	1152
14.20.2. Theoretical Ballistic Basis of Energy Transfer and Evolution of Analyses	1155
14.20.3. Criteria for Ballistic Pathological Anatomy Examination	1159
14.20.4. In the Brain	1160
Case Studies	1167
14.20.5. In the Skin Layers	1169
14.20.6. In Subcutaneous Tissue and Connective Stroma	1177
14.20.7. In Skeletal Muscle - Striated Muscle Cells	1181
14.20.8. In Cartilage	1182
14.20.9. In the Lungs	1184
14.20.10. In the Liver	1186
14.20.11. In the Breast (Mammary Gland)	1187
14.20.12. In Blood Vessels	1188
14.20.13. In Peripheral Nerves	1191

14.20.14. Inflammatory Reaction and Cellular Response	1192
Chapter Summary	1197
Chapter Bibliography - Sources	1199
 CHAPTER 15. Crime Scene	 1203
15.1. General	1203
15.2. Scene Management	1205
15.2.1. Crime Scene Protection	1205
15.2.2. Preliminary Examination - Crime Scene Investigation ...	1206
15.2.3. Narrative Description - Notes	1207
15.2.4. Sketch	1207
15.2.5. Photography - Video Recording	1208
15.2.6. Collection, Labeling, Packaging, and Preservation of Evidence	1209
15.2.7. Measures and Rules for the Safe Handling of Evidence	1211
15.2.8. Violent Crime Analysis Unit (UACV, Italian Police)	1212
15.3. Scene Reconstruction	1214
Case Studies	1219
Chapter Summary	1259
Chapter Bibliography - Sources	1260
 Expert Examination Questions and Answers - Volume B	 1263
 Appendix: Comprehensive Analysis and Evaluation of Case Studies	 1281
